ENVIRO-LEAN® BACKGROUND

With great success, quality professionals have been steadfastly working to develop processes that improve an organizations quality and customer satisfaction performance. We know these tools as Six Sigma, Lean Manufacturing, Kiazan, Kanban, 5S and others.

Now, environmental and health safety professionals are developing similar improvement process tools to reduce environmental impacts and health and safety risks. These new tools also save money and improve organizational profitability.

Enviro-Lean® is one of these new tools designed by and for environmental professionals to help identify and manage environmental performance improvement projects. Enviro-Lean® is designed as a stand alone environmental management system or can be used as an enhancement to an organizations existing EMS such ISO 14001.

Enviro-Lean® is a registered trade mark which is meant to send a signal of superior performance to customers and others interested in an organizations environmental performance.

The use of the Enviro-Lean® mark is prohibited without the written authorization of Environmental Compliance Systems, Inc.
